MASTER OF BUSINESS ADMINISTRATION (MBA)

Awariness on Trend in Technology

Date: 17-08-2022 To 16-08-2022

Experts: I3 Design Factory , Coimbatore

Description:

The program Awareness on Trend in Technology has provided more knowledge on robotics, computer-generated imagery (CGI), artificial intelligence (AI), 5G, and extended reality (XR). With its lightning-fast speeds and extremely low latency, 5G wireless technology redefines connection and makes innovations like driverless cars and smart cities possible. This program taught our kids about 5G. In order to create immersive experiences that go beyond the digital and physical worlds, extended reality (XR) combines virtual, augmented, and mixed realities. Examples of such experiences include virtual gaming and training simulations. By using advanced software to create incredibly lifelike images for films, video games, and applications, computer-generated imagery (CGI) transforms the development of visual material. This sparks students' interest in generating their own content. By giving machines intelligence and the ability to learn and make decisions, artificial intelligence (AI) is revolutionizing a variety of industries. This programme brought us together to know about the emerging technology very well.

Communication Skills

Date: 21-09-2022 To 01-10-2022

Experts: ANCIT Edu Tech, Coimbatore

Description:

The program's goal was to give students the fundamental communication skills they would need to succeed both personally and professionally. Enhancing pupils' verbal, writing, and interpersonal communication competency is the major goal. Encouraging students to communicate ideas clearly, interact with a variety of audiences in an effective manner, and improve their communication skills in general was the aim. Workshops and seminars, role-playing activities, guest lectures, one-on-one coaching, and a feedback mechanism are among the program's components. The program was quite beneficial for Both the students and the students showed improved confidence, coherence, and clarity in their verbal communication, as seen by their more active engagement in group discussions and their well-spoken presentation delivery. Their ability to communicate in writing improved, resulting in better report writing, email correspondence, and business writing.

Life Skill - Yoga

Date: 27-01-2023 To 07-02-2023

Experts: Good Health Corp, Coimbatore

Description:

This Yoga Session makes the students to accept yoga as a life skill is similar to finding a potent toolset for overcoming the obstacles of academic life and personal development. Beyond just bending and stretching, yoga develops into a reliable ally for navigating tests, deadlines, and the highs and lows of being a student. It serves as a pause button for the hectic collegiate rhythm, providing a haven where tension melts away with every deliberate breath. During study sessions, yoga turns into a useful tool for improving focus and memory recall. Beyond its health benefits, yoga serves as a mirror that emphasizes the value of self-care. It imparts values such as respecting one's own limitations, listening to one's body, and appreciating balance in all facets of life. As a quick but necessary diversion from the demands of school, the practice develops into a ritual that supports resilience and mental health. For students, yoga is really more than just a set of postures; it's a safety net that helps them stay balanced as they move through the years of profound learning and personal growth. This session motivated the students to embrace their highest potential, guiding there to a life of vitality, purpose, and fulfillment.

Life Skill - Entrepreneurship

Date: 17-04-2023 To 19-04-2023

Experts: Proodle Innovation hub Pvt Ltd, Coimbatore

Description:

A dynamic life skill, entrepreneurship generates creativity, resilience, and an unwavering quest of innovation. Entrepreneurship enables students to recognize obstacles as opportunities and transform their passion into purpose, going beyond textbooks and lectures. This is a journey that promotes learning new things constantly, being flexible, and taking strategic risks. It aids in our students' navigation of the entrepreneurial environment and teaches them to accept failure as a necessary step on the path to achievement. It teaches students to be resourceful, think critically, and solve problems in the real world. It's a skill that transcends the classroom. They are driven to transform ideas into action and ambitions into reality by the entrepreneurial spirit, which acts as a compass. The goal of this program on entrepreneurship life skills for students is to foster a mindset that lives on creativity, resilience, and the capacity to overcome obstacles and turn them into opportunities for success. It goes beyond simply helping students start firms. This life skill develops students' feeling of autonomy, leadership, and self-assurance to forge their own unique career path while preparing them for the uncertainties of the future. Essentially, entrepreneurship is an immersive learning experience that develops students become proactive, visionary leaders of the future, rather than merely being a subject.

Awareness on Trend in Technology

Date: 30-08-2021 To 31-08-2021

Experts: I3 Design Factory, Coimbatore

Description:

In this Session Students are negotiating a technological landscape that has been molded by four major transformational forces: big data, blockchain, cybersecurity mesh, and the internet of things (IoT). IoT offers students an exciting approach to enter a connected world. It's a way of life, not simply about wearables or smart homes. While there's no denying the ease of using connected devices, worries about data security and privacy must be balanced. For kids, the idea of a Cybersecurity Mesh is a ray of optimism in an age of digital dangers. Building a cooperative and flexible defense is equally as important as simply securing data. it's about creating a collaborative and adaptable defense. Big Data isn't just a term; it's a treasure trove of possibilities. Students are captivated by the power of analyzing vast amounts of information, recognizing its potential impact on decision-making across various fields. Blockchain t's a technology that sparks the entrepreneurial spirit within students. It was an eye opening session about the recent trends in technology to our students.

Life Skill - Yoga

Date:02-02-2022 To 17-02-2022

Experts: Good Health Corp, Coimbatore

Description:

Accepted as a lifelong skill, yoga becomes a powerful ally for students as they navigate the challenges of academic life. In addition to physical poses, yoga teaches students a wealth of tools for managing stress, improving mental clarity, and improving overall wellness. Yoga helps students balance the demands of academic life with mindfulness, improving focus and resilience. Yoga as a life skill is a practice that goes beyond the mat. Yoga helps students become more aware of themselves, regulate their emotions, and create a sense of inner peace. Yoga equips students with an invaluable toolkit for maintaining their physical and mental well-being, helping to create a more balanced and fulfilled student life.

Life Skill - Entrepreneurship

Date:04-04-2022 To 08-04-2022

Experts: Cultiv8, Coimbatore

Description:

Considered a life skill for students, entrepreneurship embodies an innovative and independent spirit that goes beyond commercial knowledge. Students are encouraged to think creatively, see obstacles as opportunities, and develop resilience in the face of uncertainty throughout this life-changing experience. Entrepreneurship transforms from an academic concept into a practical skill that students can use outside of the classroom. It helps students become more adaptive, take initiative, and hone important problem-solving skills. It fosters a spirit of initiative, equipping students to negotiate the ever-changing professional landscape and fostering a mindset that values self-reliance, initiative, and the pursuit of significant influence. Encouraging students to pursue entrepreneurship as a life skill essentially gives them the ability to confidently and creatively handle the always changing problems of the working world. The session was very helpful for the students to know more about entrepreneurship

Life Skill - Health & Hygiene

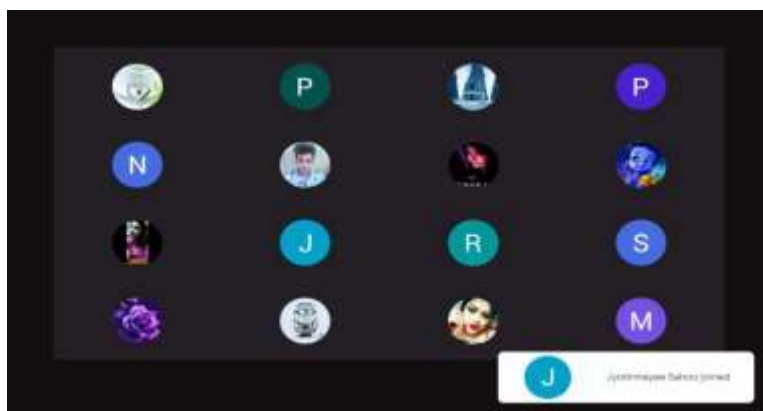

Date:05-10-2020 To 06-10-2020

Experts: Good Health Corp, Coimbatore

Description:

The programme on Health and hygiene, which are vital life skills for students, include practices such as consistent exercise, eating a balanced diet, and maintaining personal hygiene. Through proactive self-care and a healthy lifestyle, these skills enable students to make decisions that are beneficial to their long-term health. Students acquire behaviors that improve their quality of life, avoid illness, and promote general well-being via health and hygiene instruction. Encouraging responsible behaviors like regular handwashing, taking care of your teeth, and maintaining good grooming is emphasized since these actions add up to a safer community and a healthier way of life. These skills go beyond the classroom, shaping a foundation for lifelong wellness and encouraging a proactive approach to personal health, resilience, and self-care.

Awariness on Trend in Technology

Date:03-12-2020 To 04-12-2020

Experts: Mayagreens, Coimbatore

Description:

The programme on Trends in technology make our students to know about Modern technologies that influence our present and future include automation, 3D printing, and distributed clouds. Automation is the process of carrying out activities with the least amount of human involvement by using technology. In a variety of industries, including data analysis and manufacturing, it increases production and efficiency. Layer by layer creation of complex patterns is made possible by 3D printing, which completely transforms the way items are made. It offers new opportunities for innovation and has applications in industries including manufacturing, architecture, and medicine. A decentralized method of cloud computing known as the distributed cloud disperses computer resources among several sites. This promotes developments in the digital world by improving scalability, dependability, and data availability. Understanding these technologies helps students get ready for a future when creativity and agility are essential, as well as interesting employment prospects. These developments influence how we work, create, and engage with the outside world.

Awariness on Trend in Technology

Date:02-09-2019 To 03-09-2019

Experts: I3 Design Factory, Coimbatore

Description:

In this Awareness session our students came to know about the recent trends in technologies like Sensing & Motion, Augmented Human, Postclassical Compute and Comms, and Digital Ecosystems where they can able to Discover how technology, such as motion sensors in game consoles or fitness trackers that track physical activity, senses and reacts to the environment to enhance experiences. Explore the realm of wearable technology and augmented reality, where gadgets boost human talents. Imagine wearables like smartwatches, augmented reality glasses, and brain-computer interfaces?trilling opportunities for both work and daily life. Utilize cutting-edge technology like quantum computing and decentralized communication models to go beyond standard computing. These technological advancements offer more effective, potent, and rapid means of communication and information processing. Explore the world of digital platforms, where services are effortlessly integrated and networked. Consider how your applications, internet services, and smartphone all function to provide a cohesive, networked, and cooperative digital experience.

Life Skill - Health & Hygiene

Date:04-11-2019 To 06-11-2019

Experts: Good Health Corp, Coimbatore

Description:

This initiative raised awareness of cleanliness and health. For students, knowing and maintaining good hygiene and health are essential life skills throughout the COVID-19 epidemic. It entails adhering to instructions to keep others and yourself safe from the infection. This includes wearing masks in public places, keeping a physical distance from others, regularly washing your hands with soap, and keeping up with the most recent health advice. Students that prioritize health and cleanliness help create a safer atmosphere, lower their risk of infection, and stop the virus from spreading. These practices not only protect one's own well-being but also show the community that one is a responsible and compassionate member of society in these trying times.

Awariness on Trend in Technology

Date: 27-08-2018 TO 28-08-2018

Experts: Mayagreens, Coimbatore

Description:

Our students learned about current technological developments in this class, including artificial embryos, 3D metal printing, and competing neural networks. wherein Metal Printing in 3D Discover the realm of modern manufacturing with 3D metal printing, a technique that uses metal components to produce complex items layer by layer. It's similar to translating computer blueprints into real, accurate metal constructions, completely changing sectors like healthcare and aerospace. To learn about Artificial Embryos, our students envision a biotechnological future in which researchers are creating artificial embryos. These artificial structures, which were developed in a lab, resemble the initial phases of embryonic development and offer biological insights as well as prospective uses in reproductive research and future medicinal developments.

Communication Skills

Date:04-02-2019 To 14-02-2019

Experts: ANCIT Edu Tech, Coimbatore

Description:

Students who want to engage and convey ideas clearly need to have strong communication skills. This life skill includes communicating both verbally and nonverbally, attentively listening, and changing one's communication style according to the context. Students who possess excellent communication skills are better able to express their ideas, work well with others, and establish enduring bonds with others. These abilities provide the foundation for future success in the classroom and in the workplace. Students demonstrated more clarity, coherence, and confidence in their verbal communication, as seen by their well-spoken presentations and improved participation in group discussions. They were clearly communicators based on their articulate delivery of the presentation and their more engaged engagement in group discussions. As a result of their improved ability to communicate in writing, they became more proficient writers of emails, reports, business letters, and email exchanges. writing.
